MARTECH STRATEGY PROPOSAL

Budget: \$200,000 | 90-Day Impact Plan | April 2025

What We Will Cover Today

Executive Summary

The 3 core problems and our fix

Future-State Design

Right-sized target stack

Customer Journey Maps

3 end-to-end journeys

Information Flow Map

What talks to what, how fast

Pain Points & Use Cases

Prioritized user stories

Activation Strategy

Audiences, triggers, suppression rules

Stack Assessment

Keep / Fix / Retire decisions

Measurement Plan

7 KPIs, 1 source of truth each

Business Requirements

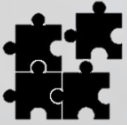

Plain-language BRD

30/60/90-Day Roadmap

Sequenced plan with measurable outcomes

Executive Summary: Three Problems Costing Us Right Now

Identity Fragmentation

3–5 Profiles

per customer across Shopify, Square and Klaviyo. Every segment we have build is wrong.

Data Timing Gaps

24–72 hrs

Store purchase lag. Customers get cart-abandon emails for items they already bought in-store.

No Single Source of Truth

3 Dashboards

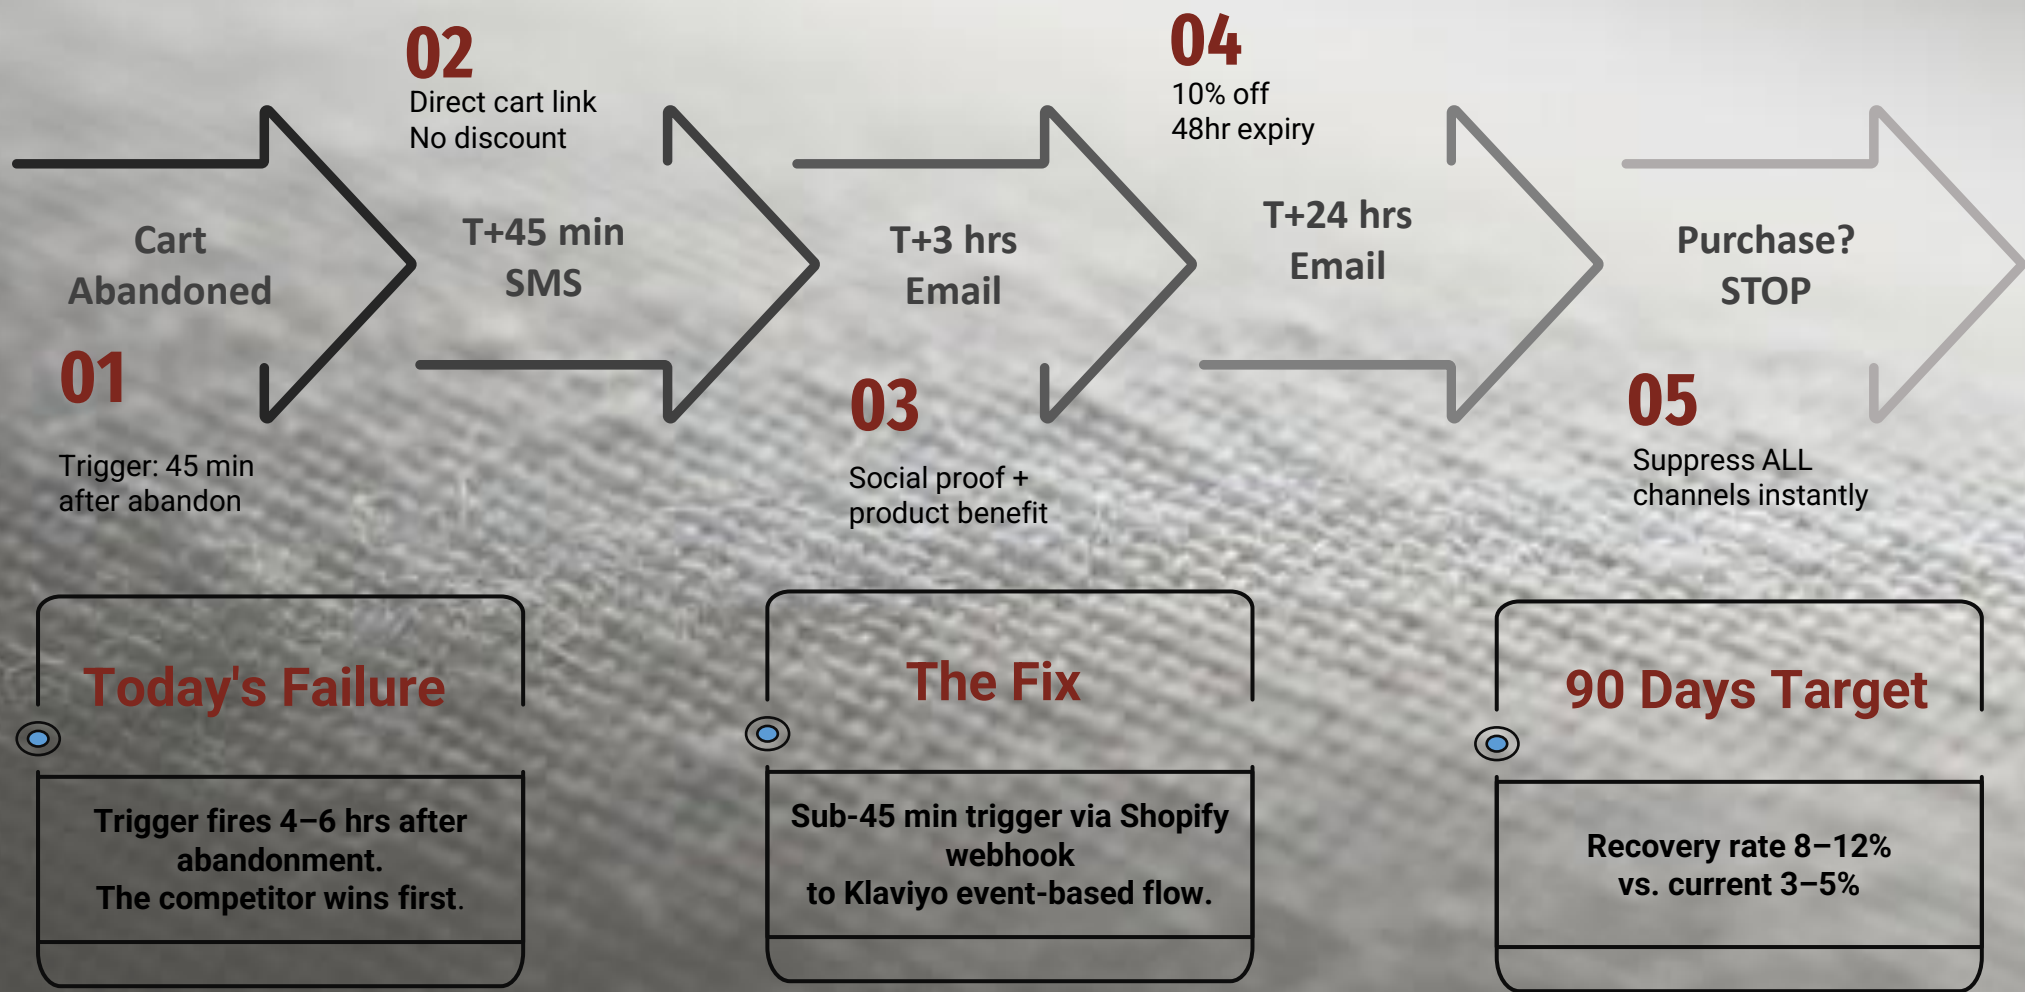

Shopify, GA4, and Klaviyo all report different revenue numbers. Leadership can't trust any of them.

OUR FIX: CDP + 3 automated journeys + 1 reporting layer = measurable impact in 90 days within \$200K

C U S T O M E R
J O U R N E Y S

Journey 1: Cart Abandonment — Threadline Loses \$7.5K–\$15K/Month Here

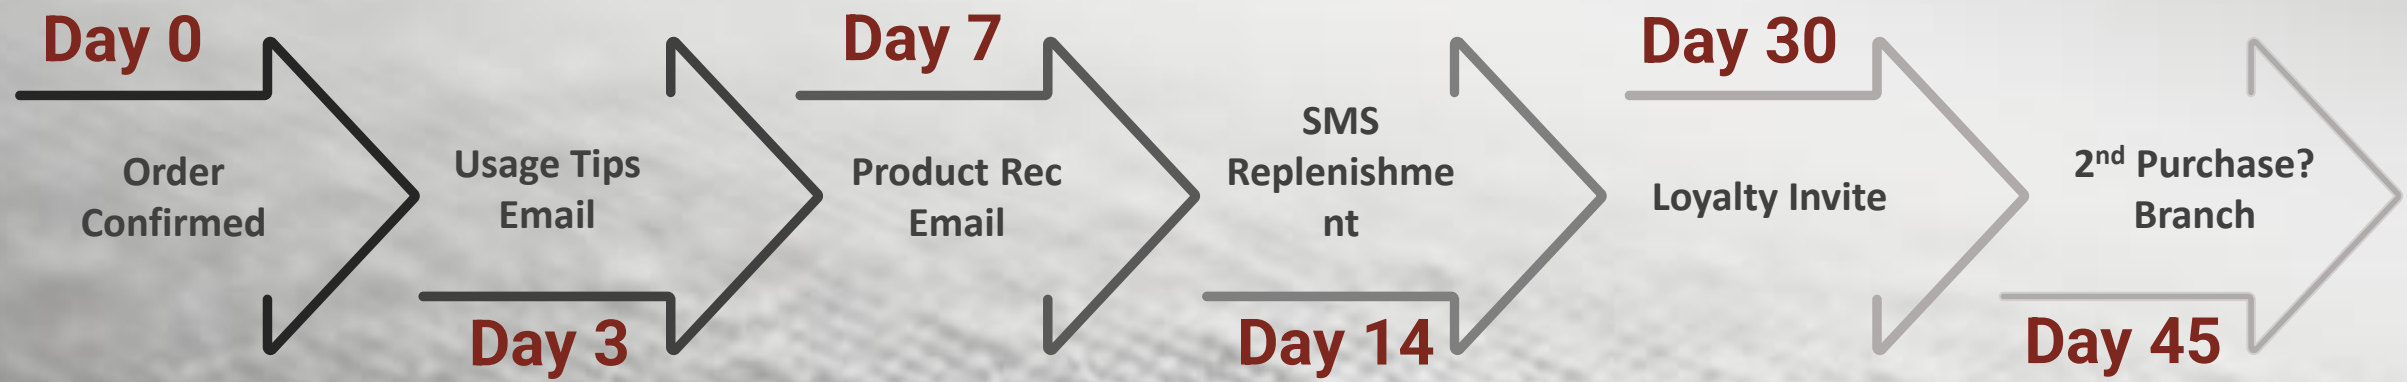

Cart Recovery Rate: +10–15%

Retargeting Overlap: <2%

Revenue Lift: +\$7.5K–\$15K/mo

Unsubscribe Rate: Stable

Journey 2: First Purchase to Repeat Buyer — Target +5–8 pts in 30 Days

Purchased → Loyalty Track

No Purchase → Winback Flow

Today's Failure

No post-purchase flow.
Next comms is a promo blast.
Retargeting runs for 30+ days.

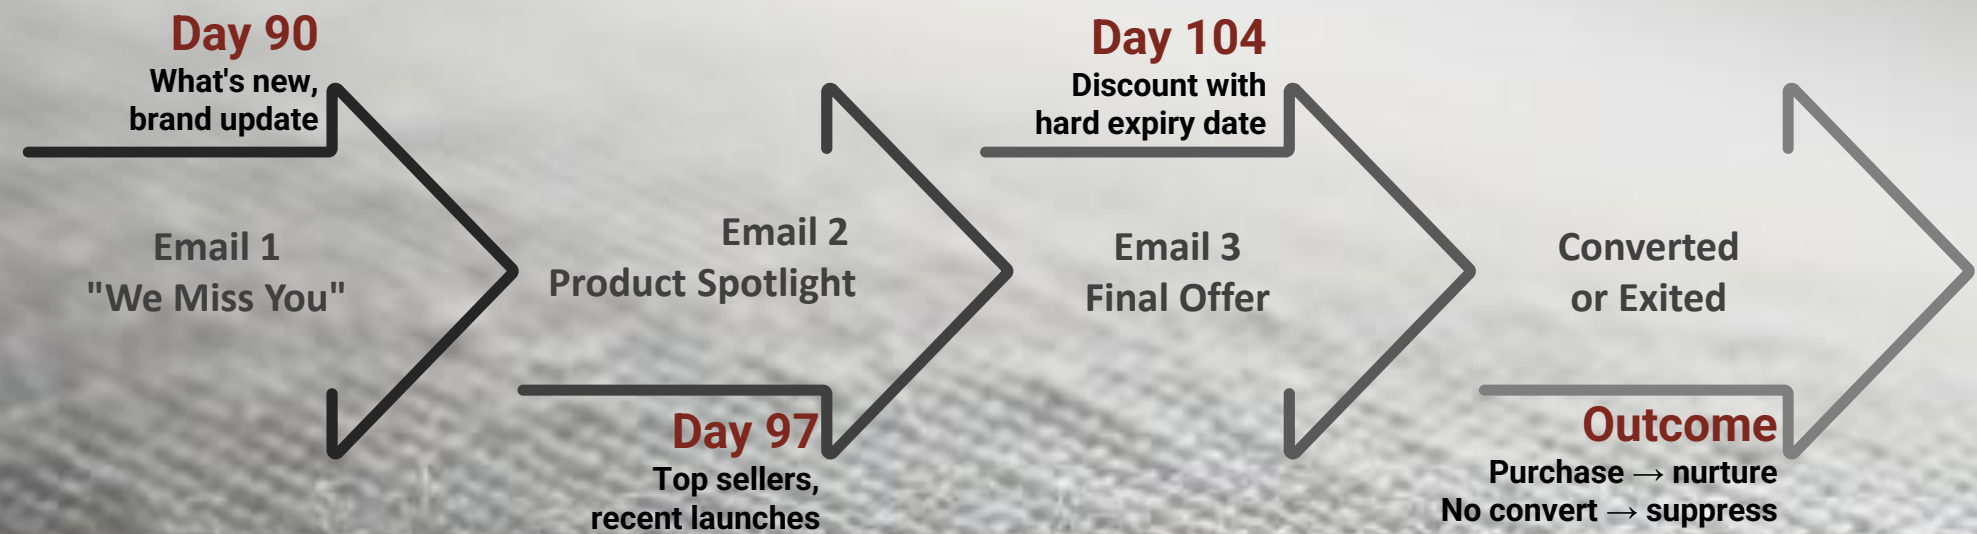

The Fix

CDP event-triggered Klaviyo flow.
Meta retargeting OFF for 30 days post-purchase.

90 Days Target

30-day repeat rate: +5–8 pts
Support tickets (order status): -20%
Cross-sell CTR tracked

Journey 3: Lapsed Customers — 8–12% Can Come Back

LAPSED CRITERIA: 90+ days no purchase | No email open | Not currently in an active flow

Today's Failure

Winback goes to active buyers.
Store purchasers excluded entirely.
No exit path after 3 emails.

The Fix

CDP-segmented lapsed list.
Auto-exit to low-frequency nurture
after 3 emails with no conversion..

90 Days Target

Winback conversion: 8–12%
Revenue per reacquired customer
vs. new customer CAC tracked

P A I N P O I N T S
& U S E C A S E S

Prioritized Use Cases: P0 Problems Must Work at Launch

Priority	Business Problem	Required Fix
P0	Purchasers still see ads 48+ hrs after buying	Suppress within 2 hrs (ecomm) / 24 hrs (store)
P0	Same customer has 3–5 profiles across systems	Single unified profile: Shopify + Square merged by email
P0	Store purchase data arrives 24–72 hrs late	Daily POS batch to CDP, capped at 24 hrs
P0	Wrong items appear in cart-abandon emails	Klaviyo renders exact line items from Shopify cart event
P1	No agreed KPI source of truth	One Looker Studio dashboard, signed-off definitions
P1	One person owns all lifecycle flows — single point of failure	All flows documented with logic maps + named secondary owners
P2	Lapsed customers never exit the winback sequence	Auto-exit to low-frequency nurture after 3 emails

C U R R E N T
S T A C K
A S S E S S M E N T

Stack Inventory

System	Decision	Core Issue
Shopify	KEEP + FIX	No real-time event streaming to other systems
Klaviyo	KEEP + UPGRADE	Batch sync only; no suppression logic; one-person bottleneck
Meta + Google Ads	KEEP + FIX	Retargeting not suppressed after purchase; stale audiences
GA4	KEEP + FIX	Revenue numbers don't match Shopify; not the trusted SOR
Gorgias (Support)	KEEP + INTEGRATE	Tickets not connected to email suppression; complaints get promos
Yotpo (Loyalty)	KEEP + CONNECT	Loyalty data not used in segmentation; reviews don't trigger flows
Square / Lightspeed	KEEP + FIX	24–72 hr lag; 40% of transactions have no email captured
Spreadsheet Reporting	RETIRE	Hours to reconcile; always stale; leadership can't trust it
Segment CDP	ADD — NEW	Missing identity + connection layer. This is the fix.

A grayscale photograph of a person standing on a rocky cliff edge, looking out over the ocean. The person is partially obscured by a large, solid red rectangular overlay that contains white text. The text is arranged in three lines, with the first line being the most prominent.

F U N C T I O N A L
R E Q U I R E M E N T S

Four Business Outcomes, Four Requirements That Protect Them

BR01- Stop Wasting Ad Spend

Purchasers suppressed from paid media within 2 hrs (e-commerce) and 24 hrs (store). Eliminates est. \$15–25K/month in wasted budget.

BR02- Increase Repeat Purchase Rate

3 automated journeys targeting +5–8 percentage points in 30-day repeat rate within 90 days.

BR03- One KPI Source of Truth

One reporting layer, agreed definitions. No more spreadsheet reconciliation. Leadership trusts one number.

BR04- No Single-Person Bottleneck

All flows documented with logic maps and named secondary owners. No dependency on any one person to operate.

TOP P0 REQUIREMENTS: FR-01: Unified profile within 24hrs | FR-02: Suppression auto-fires within 2hrs | FR-03: Full cart line items in email | FR-10: No engineering for day-to-day ops

One New Layer Fixes Everything: The Segment CDP

DATA SOURCES

Shopify (eComm)

Square / Lightspeed (POS)

GA4 (Web Behavior)

Gorgias (Support)

SEGMENT CDP

Identity Resolution Hub

Single customer profile

Online + store identity merge

Real-time event routing

Daily audience sync to ads

~\$36–60K/yr

DESTINATIONS

Klaviyo (Upgraded)

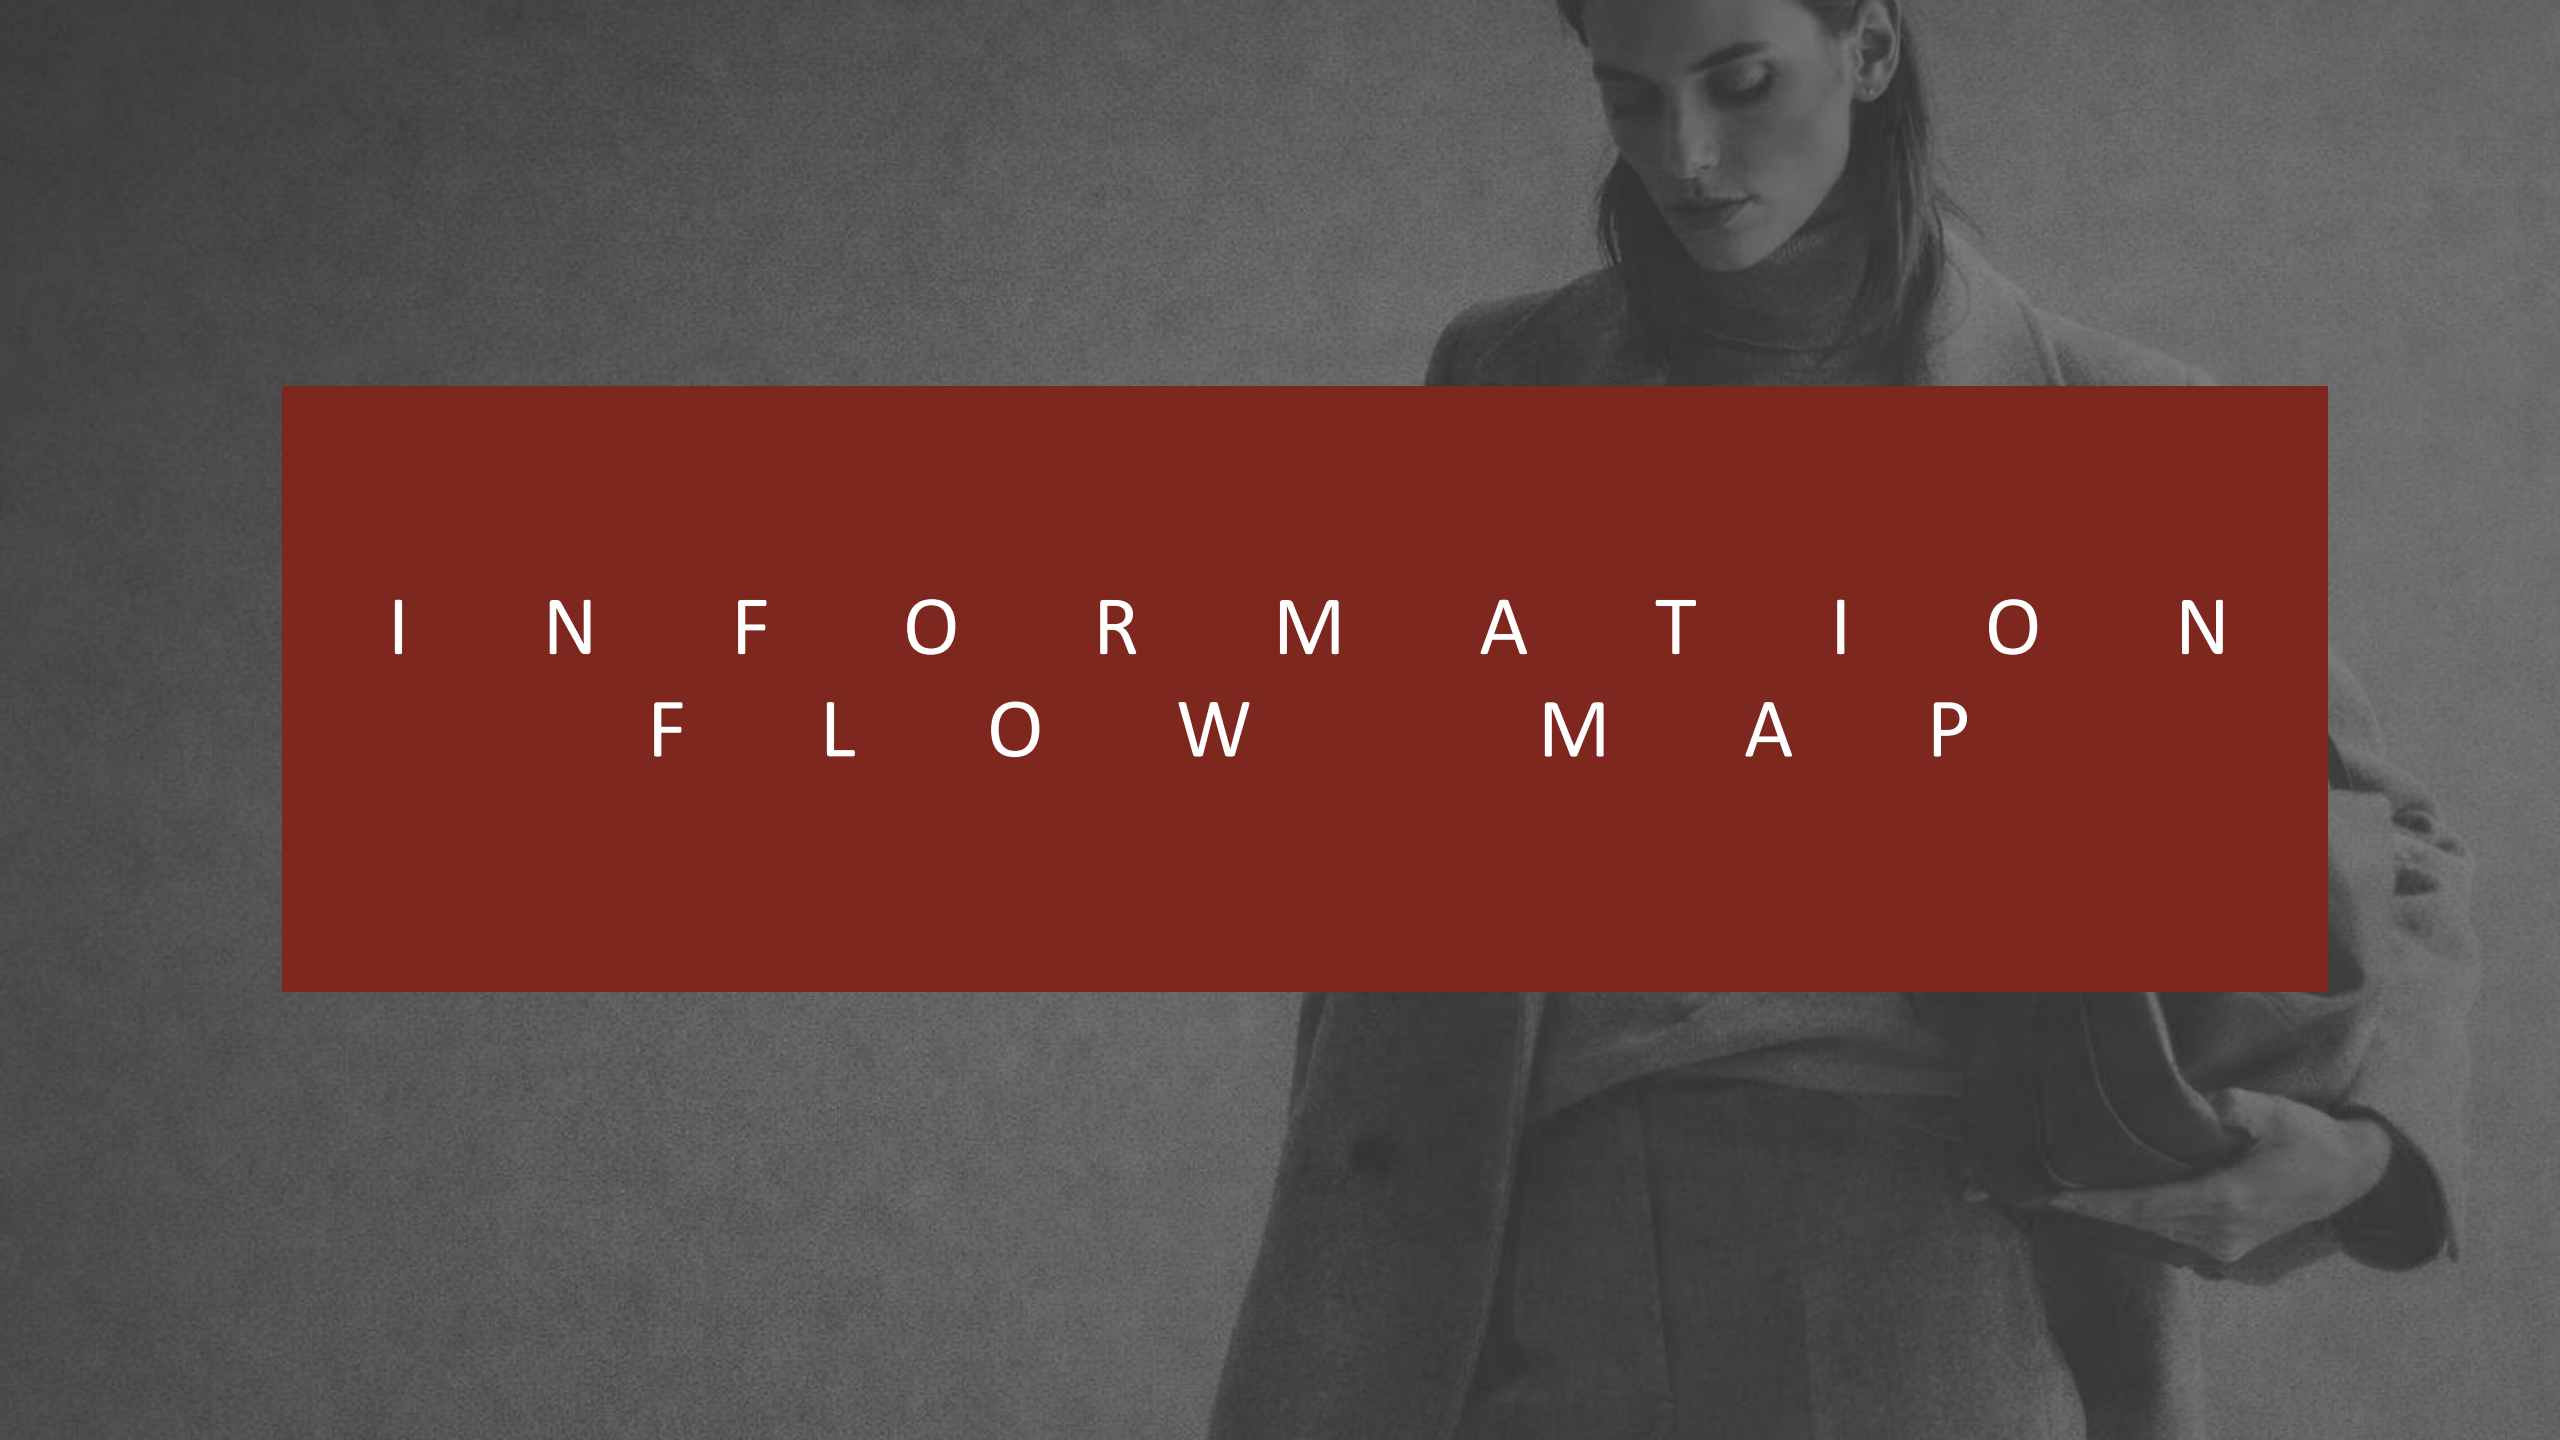

Meta + Google Ads

Looker Studio (New)

Yotpo (Loyalty)

A grayscale photograph of a woman with dark hair, wearing a turtleneck sweater and a light-colored coat. She is looking down and slightly to her left. A large, solid red rectangular box is overlaid on the center of the image, containing white text.

I N F O R M A T I O N F L O W M A P

Every Data Connection Mapped to Speed and Integration Type

Source	Destination	Data Moving	Speed	Integration
Shopify	Segment CDP	Orders, cart events, line items, refunds	Real-time	Native webhook
Square POS	Segment CDP	In-store transactions, customer email, store location	Daily batch	API / CSV export
Segment CDP	Klaviyo	Unified profile, purchase events, suppression flags	Real-time	Native CDP destination
Segment CDP	Meta Ads	Purchasers (suppress), lapsed, abandoners	Daily	Native CDP destination
Segment CDP	Google Ads	Purchasers (suppress), lapsed, abandoners	Daily	Google Ads API
Gorgias	CDP / Klaviyo	Open ticket status, resolution, category	Real-time	Gorgias webhook
Shopify+Klaviyo+GA4	Looker Studio	Revenue, email performance, traffic & behavior	Daily	Supermetrics connectors
SLA RULE: Shopify order events < 5 min to CDP POS suppression < 24 hrs Paid media suppression list refresh < 2 hrs

S T R A T E G Y

Who Gets What, When — and Who Gets Nothing

AUDIENCES

High-Intent Browsers

Viewed product 2x OR added to cart. No purchase in 7 days.
Source: Segment CDP (real-time)

Recent Purchasers — Suppress

Any purchase in last 30 days (online or in-store).
Source: Segment CDP (real-time ecomm / 24hr store)

Lapsed Customers — Winback

90+ days, no purchase, no email open.
Source: Segment CDP (daily refresh)

High-LTV VIPs (Top 20%)

Top lifetime spend quintile via dbt model.
Use: Early access, lookalike seed for Meta.

SUPPRESSION RULES

Trigger Event	Suppressed From	Window
Online purchase	Promo email + retargeting	2 hrs
Store purchase	Promo email + retargeting	24 hrs
Open support ticket	All promo email + ads	Real-time
Unsubscribe	All email	Instant
Winback non-convert	Promo email (nurture only)	After 3rd email
Full-price buyer (21d)	Discount promos	21 days

A grayscale photograph of a person's hands measuring a piece of dark fabric with a measuring tape. The background is blurred, showing a white surface and a dark object. A large, solid red rectangle is overlaid on the center of the image, containing the text 'MEASUREMENT PLAN' in white, uppercase, sans-serif font.

MEASUREMENT PLAN

One Number Per KPI — No More Dashboard Wars

KPI	Journey	90-Day Target	System of Record
Cart Recovery Rate	J1	+10–15% lift	Klaviyo (flow revenue)
Suppression Overlap Rate	J1 + J2	<2% overlap	Meta Ads Manager + Google Ads
30-Day Repeat Purchase Rate	J2	+5–8 pts	Shopify (orders by customer)
Support Ticket Rate (Order Status)	J2	Down 20%	Gorgias (ticket volume by category)
Winback Conversion Rate	J3	8–12% of lapsed	Shopify + Klaviyo (cross-ref)
Email Unsubscribe Rate	All	<0.3% per send	Klaviyo (list health report)
Identity Resolution Rate	Foundation	85%+ matched	Segment CDP (merged profile count)

ATTRIBUTION RULE: If Shopify revenue and attribution tool differ by >8%, the discrepancy is investigated before any budget decision is made.

3 0 / 6 0 / 9 0
D A Y R O A D M A P

Sequenced by Dependency

Nothing Launches Before the Foundation Is Set

Days 1 - 30

Stop the Bleeding

- 1 Stand up Segment CDP + connect Shopify
- 1 Audit + fix GA4 event taxonomy
- 1 Configure Square daily batch to CDP
- 1 Connect Klaviyo to CDP with identity rules
- 1 Agree on KPI definitions with leadership

Day 30: Suppression <2 hrs. Cart abandoned <45 min. CDP live. ~\$8K/mo wasted spend stopped.

Days 31 - 60

Build the Machine

- 1 Build + QA cart abandon flow in Klaviyo
- 1 Configure Meta + Google suppression sync
- 1 Build + QA post-purchase flow
- 1 Launch Looker Studio dashboard
- 1 Document flows + assign secondary owners

Day 60: Single customer view live. First journey active. All teams on one dashboard.

Days 61 - 90

Prove the ROI

- 1 Launch lapsed customer winback flow
- 1 A/B test cart recovery subject lines
- 1 Connect Yotpo loyalty to CDP segments
- 1 POS identity matching: target >45% match rate
- 1 Prepare CFO-ready 90-day impact report

Day 90: Three working journeys. One KPI dashboard. Attribution governance enforced.

What the CFO Sees on Day 90

50+ Days Live

Cart Recovery Flow

Revenue attribution data available

40+ Days Live

Post-Purchase Flow

30-day repeat rate tracking active

<2% Overlap

Suppression Rate

Wasted paid spend documented

1 Dashboard

Looker Studio Live

All KPIs. No spreadsheets.

85%+ Matched

Identity Resolution Rate

Segment CDP unified profiles

8–12% Target

Winback Flow Launched

First conversion data visible

ESTIMATED ANNUALIZED VALUE OF ALL INTERVENTIONS: \$270K – \$480K | Against a \$200K Investment

This is not a tool's problem.

Threadline already has most of the tools.

It is a connections problem

Fixed by Segment CDP

It is a data timing problem

Fixed by daily POS pipeline + real-time webhooks

It is a governance problem

Fixed by documented flows + agreed KPI definitions

Day 90: Three working journeys. One KPI dashboard. A data foundation that scales.
